1. In the wooded hills in the vicinity of Srebrna Gora (Silberberg, S52) the Soviets have erected towers (with a small hut near each tower) in several places on the highest elevations. Access is forbidden; there is telephone communication, and each place is guarded by a sentry. The local population is of the opinion that they are interception stations. It is stated that there are three such towers near Srebrna Gora and many others in other places.

2. A Soviet Military Command with a strength of forty men is stationed on Plac (Place) Wolnosci in Bytom (Y58).

3. The 51st AA Artillery Regiment is stationed approximately four kilometers beyond Bytom in the direction of Piekary. The troops are billeted in barracks and in private houses. The guns are of American type, parked, wired in, and guarded.

50X1-HUM

4. Seven large camouflaged hutments have been observed on an island in the Oder near Schwedt (C31); there were more such hutments in the interior of the island, which is overgrown with high bushes. The shore of the island was surrounded with three rows of barbed wire, and there were sentry boxes every sixty meters with two Soviet sentries in each box. The Soviets, together with German scientists, are allegedly conducting experiments on some new weapons on the island.
